# Weather Key Points

Regional Operations Center

Western Region

Tuesday, February 14

- A fast-moving but cold winter storm will impact the state through late Tuesday
  - Strong, gusty winds reaching 40 to 50 mph will be noted over much of central and southern California Tuesday and Tuesday night, with local gusts of 55 to 75 mph across the southern California mountains and deserts
    - Gusty conditions, though not quite as strong, will also be seen over northern California
    - These winds could lead to downed trees and power outages and could also produce poor visibility due to blowing dust and sand in the deserts
  - Scattered rain and mountain snow showers are also expected Tuesday and Tuesday night, most numerous across northwest coastal locations
    - With snow levels falling as low as 1,000 to 1,500 feet, some impacts to travel are possible at times, including for the passes in southern California
    - Chance of thunderstorms along the northern coast on Tuesday may bring accumulating small hail
- Much colder temperatures are forecast statewide through late week with sub-freezing overnight temperatures likely for most locations just away from the coast
- Some additional light precipitation is possible Thursday through the weekend, primarily along the coastline, though details remain uncertain.

OF EMERGENCY SERVICES

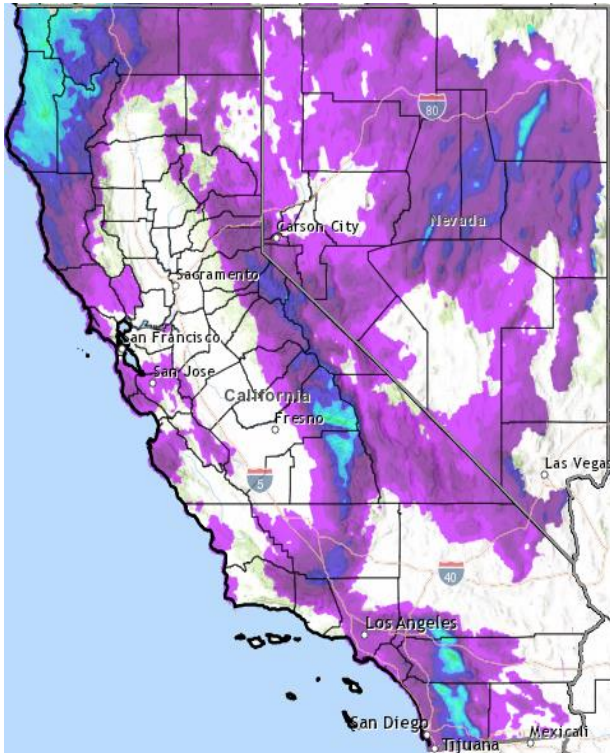

# Daily Precipitation Forecast

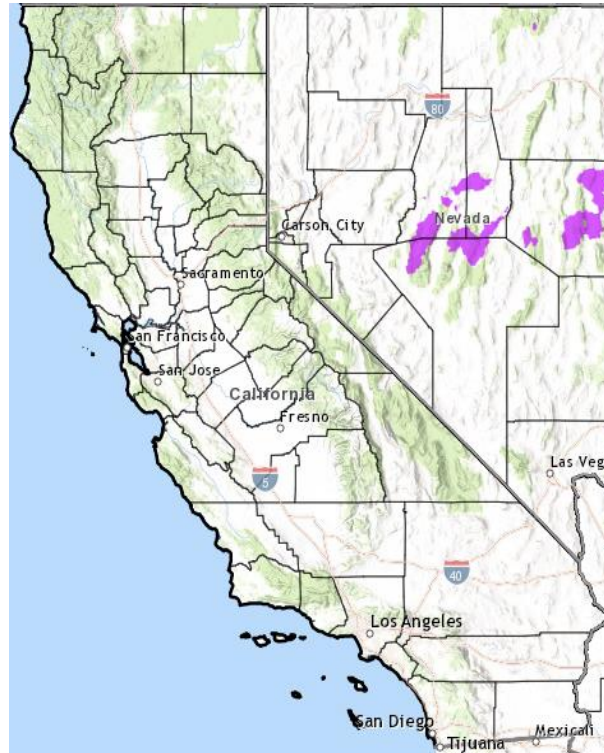

Regional Operations Center

Western Region

Tuesday, February 14

**Tuesday**

**Wednesday**

**Thursday**

**Important Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

**Precipitation (inches)**

# Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Tuesday, February 14

## 6-10 Day Outlook (February 19 - February 23)

### Temperatures

- Below normal temperatures are favored statewide

### Precipitation

- Near normal precipitation is favored for most of the state, with above normal precipitation favored for southern California

## 8-14 Day Outlook (February 21 - February 27)

### Temperatures

- Below normal temperatures are again favored statewide

### Precipitation

- Above normal precipitation is favored statewide, especially near the Oregon border

# Wildfire Forecast and Threat Intelligence Integration Center

## STATEWIDE WILDFIRE RISK POTENTIAL

**Tue Feb 14, 1200hrs**

**Wed Feb 15, 1200hrs**

**Thu Feb 16, 1200hrs**

Acres

**< 10   50   100   500   1000   5000   10000   > 10000**

Each map shows the time with the highest wildfire risk potential. 8 hour simulations are run every three hours of the day to produce a map of wildfire risk potential in acres. The average number of acres in an area should not exceed the associated number in the legend. Risk forecast does not consider suppression efforts. Courtesy of Technosylva.

OF EMERGENCY SERVICES

# Wildfire Forecast and Threat Intelligence Integration Center

## Weekly Fire Potential and Weather Forecast

### Northern Region

- Significant fire risk will remain in the "little to no risk" category for the next 7-days despite some gustier, dry wind periods due to the lack of flammable fuel alignments across all elevations, though the stronger north winds this afternoon and northeast winds tonight through Wednesday morning may elevate initial attack activity somewhat.
- Moisture found within the mountain snowpack currently ranges 160-195% of normal for the date. Low snow levels today will bring some brief, light snow accumulations down to 1000 ft with the deeper and more consistent snowpack remaining above 4000-5000 ft.
- Dead fuel moisture values will continue to fluctuate the next 7 days due to modest cool/moist intrusions intermingled with dry-gusty patterns. ERC's may be unseasonably high at times but not at significantly flammable levels.
- Herbaceous grass and forbs are exhibiting a solid flush of green-up, generally below 2500-3000 ft, and the abundant soil moisture will continue to feed this growth although cooler temperature periods will lessen the intensity of growth. The abundant standing dead from the previous growing season has been significantly altered or "melted", thus lowering the fire spread threat across many areas.
- Live woody brush-shrubs and tree canopies contain mixed flammability based on the limited sampling that has been done the past month. Dormancy has set in across the mid and upper elevations with little change expected. Some new growth is occurring for some species across the lower elevations.

### Southern Region

- There will be little or no fire activity across the region through the forecast period.
- An area of low pressure currently over the Great Basin will move to near the Four Corners Area Wednesday. Another area of low pressure will form off the Northern California Coast Thursday and then move slowly south off the coast before moving inland over Northern Baja next Tuesday.
- West to northwest winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and through the desert passes through this evening.
- The windiest locations will receive gusts to between 80 mph and 100 mph.
- Scattered showers will move across the area through tonight.

# **COVID-19 SUMMARY**

## **Coronavirus Disease 2019 (COVID-19)**

On 03/02/20 at 0700 hours, the Cal OES State Operations Center (SOC) activated at Level 1 in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

## **SMARTER Plan**

On 10/17/22, Governor Newsom unveiled the "[California Smarter Plan Updates October 2022](#)". The plan emphasizes continued readiness, awareness and flexibility and helps ensure California can maintain its focus on communities that continue to be disproportionately impacted and stay prepared to swiftly and effectively respond to emerging COVID-19 variants and changing conditions. Governor Newsom is set to lift the State of Emergency in early 2023, and this update provides information on California's progress to date and how we move forward.

## **CDPH Statewide Travel Advisory**

- For more information: [CDC Travel Guidelines](#)

## **Confirmed California COVID-19 Cases - Per California Department of Public Health Tracking COVID-19 as of 02/08/23 at 1630 hours: (report updated bi-weekly)**

- 11,061,732 (+23,466) total confirmed cases.
- 99,694 (+293) total deaths.
- Please see the most recent "Situation Report - COVID-19" attachment for additional details.
